OVERVIEW

CMS / Framework Webfact's content management system is used to create a framework for the content of costumers Websites.

webfact's CMS is deployed primarily for interactive administration of large Webpages by big Editorial Teams as well as by a potentially large number of contributors.

Started in 2003 The Basic-System was first developed for Big Brother in 2003 and contains more than 100 Administration Components and has been used in more than 200 Projects till today.

The following main tasks are accomplished with webfact's CMS:

Manage All Principle - Administration for all Contents of a Webpage by all key users and their content management roles.

User-Roles - The ability to assign roles and responsibilities to different content categories or types.

Edit and Create - Definition of the content work flow tasks
- The ability to track and manage multiple versions of contents

Publication - The ability to publish the content to a repository to support access to the content.
